

1. Open yr.no in English: <https://www.yr.no/?spr=eng>
2. Search for a location, e.g. Istanbul, and pick a point:

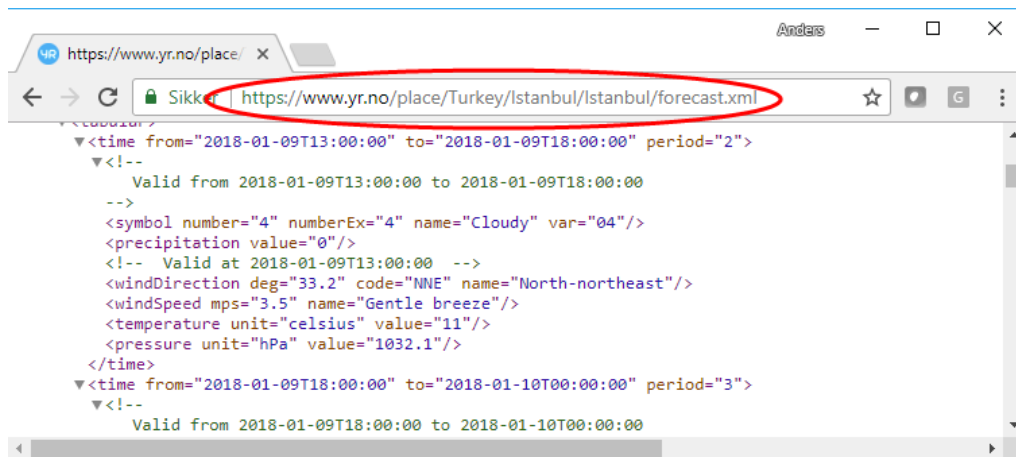

3. Scroll down to "Free weather data" and click it

4. Scroll down to "3 XML forecast" and click it

5. This gives you the XML that the scripts reads

Use the URL for column B in the spreadsheet (with http instead of https and with or without forecast.xml)
